The Force in Flexible Magnetics

Custom Packaging

Our processes provide an efficient and economical packaging service that saves you time and money. Our options include disposable, returnable, printed and unprinted containers in a variety of materials. We can even insert printed materials you provide. Buy from Magnum and ship with Magnum. We can do it all!

Systematic Advantages

From administration to production, we have the tools and processes in place to facilitate decision-making and maximize productivity. Our computerized manufacturing equipment provides precision quality; our modern administrative offices and internal systems ensure first-class efficiency on your behalf.

Our People

Our people are our most important asset. We consider ourselves fortunate to have an empowered, self-managed team. We educate, challenge and reward them to ensure superior quality and service for you.

We consider ourselves

Our Promise

Magnum Magnetics provides superior customer service and high-quality flexible magnetic sheet, strip and custom profiles, all at competitive prices. That's our promise and your assurance of satisfaction from The Force in Flexible Magnetics®.

TrakMag™ Tractor Fed Sheeting

Printing and cutting magnetic sheeting is simplified with TrakMag. The pin feed edges allow Magnum's sheeting to run on a 15-inch tractor feed plotter/printer. It is suitable for both indoor and outdoor applications. Standard surface is matte white.

Magnetic Sheeting

Magnum's magnetic sheeting accommodates many different printing methods, including screen, flexo, inkjet, offset, hot stamp and litho. Our sheeting is customizable in width, length and thickness, and, most importantly, it stays put and lays flat.

SignMag® Sign Sheeting

30 mil flexible magnetic sheeting from Magnum is the foundation for smart sign solutions. Available in matte and high gloss white, our magnetic materials will accommodate almost any size and shape specifications. Produced in both standard and custom roll lengths from our automated production lines. Cut sheets are also available.

Sign in a Tube® Vehicle Signage

Magnetic signage can easily become scratched, punctured, warped or misshapen. Protect your professional image with Sign in a Tube. Each sturdy tube contains two printable white magnetic sheets, allowing you to store your signs in the protective container when not in use, and have a spare sign for quick replacement if one is lost or damaged.

Magnum Masking Magnet™

Magnum's masking product is easy to place and reposition and is often reusable. Masking magnet can be customized in terms of chemical resistance, flexibility, size, shape and strength, making it a cost-effective alternative masking material.

LabelMag® Flexible Gap Magnet

Eliminate time-consuming and costly manual labor with this flexible magnet product. LabelMag (patent applied for) is easily adaptable to and will run efficiently on most automatic labeling machinery. Magnum can customize thicknesses, widths and magnetization of LabelMag. Contact us for assistance with your special requirements.

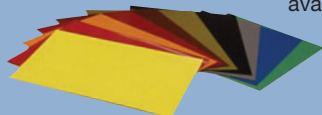

Extrusions

Magnum's flexible magnetic profiles are available in both stock and custom widths, thicknesses and lengths, and are an excellent alternative to ceramic magnets. Magnum manufactures extrusions with the highest quality raw materials and a state-of-the-art magnetization process. The result: maximum holding power.

Die-Cuts

Magnum magnets can come in a variety of shapes and sizes designed to support the sales and marketing efforts of your business or organization. Business cards, telephones, photo frames, the numeral one and delivery vans are some of the standard shapes, but we can manufacture flexible magnets in almost any shape, size, strength and color.

All Magnum® flexible sheeting products are customizable in size and strength, and many are available in nine standard colors (below). Call to discuss your specific needs and for actual color samples.

Please note that these PMS colors are approximate and that the magnet will change the appearance of the color.
